Project Description

Principal's Priority

1

We are suggesting a comprehensive technology package to include a mobile computer lab (complete with 30 laptop computers and secure mobile cart), wireless capability throughout the entire school, and a one-credit professional development course through UAA or APU for all Rogers Park certificated staff (including all instructor costs) to provide them with the knowledge and skills necessary to successfully integrate the technology into their instruction and to successfully use the mobile lab to its fullest capability. (Note: this grant request compliments the current fundraising endeavors of our PTA, who is working diligently toward purchasing document cameras and interactive white boards for our classrooms).

Benefits if Project is Funded

This grant will allow even more children to benefit from 21st century technology. Currently we have one computer lab for 530 students and many teachers do not have the knowledge or skills to make the most of this lab due to their lack of training and expertise. Additionally, more and more of the district's adopted curricula (Everyday math, Houghton-Mifflin, etc.) has technology components that are not able to be fully used in the classrooms. A mobile lab will allow more students to access technology more frequently, wireless capability will assist all students and staff throughout the building, and the professional development course will provide staff with the skills needed to fully utilize the technology that is available to them, school-wide.

Impacts if Project is not Funded

of Students impacted by project 530

Project Start Year 2010
Project Finish Year 2010

Project has matching funds are available No
Project has prior state funding available No

Project has federal funding available No

Project has has a public review process Yes Capital Request Advisory Committee
